

BREAS MEDICAL INTRODUCES THE VIVO 65 VENTILATOR

Breas Medical proudly introduces the Vivo* 65 life-support ventilator for use in hospitals, post-acute care institutions and the home, offering clinical excellence, connectivity and advanced monitoring possibilities. “Combining clinical excellence, connectivity and monitoring possibilities, the Vivo 65 ventilator is an excellent choice for both pediatric and adult patients,” says Richard Zhao, CEO of Breas Medical. “The Vivo 65 has been developed to provide highly effective and comfortable treatment and to help avoid readmissions.”

Clinical Excellence

Treating children with respiratory diseases requires true clinical excellence. That is what the Vivo 65 offers¹ thanks to its accurate volume delivery and highly responsive trigger system. In addition, it offers a wide range of modes, circuits and alarms as well as a highly intuitive graphic user interface. Altogether, the Vivo 65 is a versatile ventilator which is easy-to-use while treating a broad range of respiratory diseases invasively and non-invasively.

Connectivity

The Vivo 65 comes with the Breas PC Software, which enables simultaneous monitoring of multiple ventilators and the ability to review patient data for trends and compliance in the home. “This powerful tool will greatly facilitate workflows in post-acute care institutions, facilitate patient monitoring, save time for clinical staff and empower the homecare therapist with detailed patient profiles”, explains Eric Freer, General Manager for Breas US. “Moreover, it presents numerical data, waveforms and loops and stores data up to 365 days.”

1) Vivo 65 is indicated for use with pediatric patients >11 lbs. / 5kg

Monitoring

The Vivo 65 is the only homecare ventilator offering combined integrated SpO₂, EtCO₂ and FiO₂ monitoring. The interest for EtCO₂ monitoring is increasing rapidly since it is easy-to-use and provides continuous data on the quality of the ventilation treatment. The integrated monitoring possibilities help reduce the need for additional equipment and save cost. “The introduction of the Vivo 65 is an important step in the expansion of Breas Medical into the US market,” continues Richard Zhao. “Next, we will migrate our intuitive and easy-to-use PC software to the cloud and open it up for multiple platforms. We have an ambitious plan to provide more respiratory devices and solutions to physicians and patients in the US to help them provide better treatment, facilitate their workflows and increase efficiency.”

Breas Medical, a global leader in respiratory treatment

Breas Medical, founded in 1991 in Sweden, has become one of the global leaders in home mechanical ventilation and sleep treatment. Breas successfully markets the Vivo and iSleep product ranges, the Nippy and Clearway brands, and the Z1 CPAP range. Breas is a global company selling in more than 40 countries through a network of highly specialized distributors. Our 150 Breas employees share a passion for patients and customers which shows in our approach to customer service, product development, manufacturing, sales, marketing, quality and service.
